PRESENTATION

Ports with a future:

Zero debt and enhanced capacity to attract investment and cargo traffic.

María del Rosario Soto Rico

President of the Port Authority

The Port Authority of Almería (APA) closed 2025 with zero debt and a net profit of 12 million euros: 4 million from operations, doubling the figure for 2024, and 8 million from the termination of the concession by mutual agreement with Endesa regarding the port facilities in Carboneras. These economic-financial data, together with the execution of major projects and agreements reached that will shape the future of the ports of Almería and Carboneras from the social, environmental, and economic perspective of sustainability, and the increase in port traffic, make 2025 a very positive year for this

port authority.

In terms of infrastructure, the APA has achieved a milestone in relieving congestion at the public quay of the Port of Carboneras with the signing, together with Endesa, of the total early termination, by mutual agreement, of the electricity company's concession in the Port of Carboneras, whereby the APA recovers this maritime-terrestrial space, opening new future possibilities for cargo traffic at this port. We have also improved the port facilities of general interest in the municipality of Carboneras, following the erosion problems suffered on its southern coastal section; in this regard, we are carrying out coastal restoration and the conditioning of the access road to this port located between the southern end of the Ribera I Quay and the Holcim Terminal, a project that will be completed next year.

At the Port of Almería, we have carried out, with our own funds, the direct access from the N-340a, which allows for the diversification and increase of cargo traffic volume and facilitates the flow of vehicles, both heavy vehicles entering the port facilities and those heading to the city as they pass through the roundabout in the Pescadería neighborhood and the Parque road. Furthermore, this access represents the first phase of what will be the direct connection with the Mediterranean motorway, a project that had been blocked for more than thirty years, which we have promoted and whose project drafting should be completed by the summer of 2026. On the other hand, we are continuing with the administrative procedures for the expansion of the Pechina Dock in terms of berth line, draft, and surface area, with a planned investment exceeding 25 million euros, co-financed with 6 million euros from the Connecting Europe Facility (CEF), and an execution period of two years. The tendering process is subject to authorization by the Council of Ministers, with the expectation that this will take place in the first half of 2026.

Port-city

At the end of the year, we opened the first two hectares of the port to the city, out of a total of six planned in the Levante area, making progress in the urban integration of the Port of Almería. On the one hand, we have completed the development of one hectare at the access to the Levante Dock and are making progress in the construction of the energy-efficient envelope of the administrative building, which will also become an architectural landmark of the city. On the other hand, we have opened another hectare up to the edge of the Ribera I Dock and are working on the restoration of historic port heritage such as the 20th-century warehouse, which will provide shade for passengers and the new port-city spaces, in addition to becoming an area to host socio-cultural events; the Deutz locomotive from the late 1920s and the Babcock & Wilcox crane from the 1960s, which will become a new viewpoint.

Furthermore, the commitment of the Regional Government of Andalusia to carry out the actions of the main phase of the port-city integration has been fulfilled, with the granting to the APA of a subsidy amounting to 15 million euros, which will enable the urbanization of the Almadrabillas area, the Levante Dock, and the pedestrian bridge at the end of the Rambla; a project that continues its legal process until authorization by the Council of Ministers, scheduled for 2026.

In the western port area, we have also enhanced and opened to the city a historic building that will turn one hundred years old in 2026: the Varadero. With its restoration and adaptation, this building has become more functional, in line with current needs, featuring a hall with a capacity of over 600 people.

Cargo traffic exceeds 6 million tons

The movement of goods by the APA has grown by 12% compared to 2024, reaching 6.1 million tons; mainly driven by a 15% increase in general cargo traffic at the Port of Almería and the rise in gypsum exports at both ports, +12% at Almería and +50% at Carboneras. As for passengers, the Port of Almería consolidates itself once again as the second in Andalusia and the seventh in the national port system in terms of travelers under transport regime, with the total number, including cruise passengers, reaching 896,530, a figure slightly lower than that

recorded in 2024, mainly due to the decrease in rotations with Melilla since the beginning of 2025.

The final result of the fiscal year together with the APA's financial ratios, which confirm its optimal management both in solvency and guarantee, will allow the planned public expenses and investments to be addressed, which amount to 72 million euros for the period 2026-2029. These investments are intended, among other actions, for the execution of the main phase of the port-city project, the expansion of the Pechina Dock, works for energy efficiency and environmental sustainability, such as photovoltaic installations for self-consumption or the installation of the OPS (Onshore Power Supply) system, initiatives that will enhance the attraction of investment and the generation of industry and employment in the ports of Almería and Carboneras, especially in the latter due to the recovery of port infrastructure.

1.1.- Composition of the Board of Directors

1.1.1 Board of Directors

- **Ms. María del Rosario SOTO RICO**
PRESIDENT OF THE PORT AUTHORITY OF ALMERÍA AND OF THE BOARD OF DIRECTORS.
- **Mr. José ARANDA VASSEROT**
MARITIME CAPTAIN OF ALMERÍA.
- **Mr. Alejandro DURÁN GUTIÉRREZ**
STATE ATTORNEY
- **Ms. Begoña BALLANO OLANO** (SINCE 30/05/25)
HEAD OF THE LEGAL SERVICES AREA OF STATE PORTS
- **Mr. José María MARTÍN FERNÁNDEZ**
REPRESENTATIVE OF THE STATE ADMINISTRATION IN ALMERÍA
DEPUTY GOVERNMENT DELEGATE IN ALMERÍA.
- **Ms. María del Mar VÁZQUEZ AGÜERO**
REPRESENTATIVE OF THE MUNICIPALITIES.
MAYOR – PRESIDENT OF THE HONORABLE. ALMERÍA CITY COUNCIL.
- **Mr. Salvador HERNÁNDEZ HERNÁNDEZ** (SINCE 21/04/25)
REPRESENTATIVE OF THE MUNICIPALITIES. MAYOR-PRESIDENT OF THE ILLUSTRIOUS.
CARBONERAS CITY COUNCIL (ALMERÍA).
- **Mr. David SILES JUÁREZ**
REPRESENTATIVE OF THE TRADE UNION ORGANIZATIONS.
GENERAL UNION OF WORKERS IN ALMERÍA.
- **Mr. Antonio VALDIVIESO MONTES**
REPRESENTATIVE OF TRADE UNION ORGANIZATIONS. WORKERS' COMMISSIONS IN
ALMERÍA.
- **Mr. José CANO GARCÍA** (UNTIL 09/10/2024)
REPRESENTATIVE OF THE BUSINESS ORGANIZATIONS IN ALMERÍA. ASEMPAL.
- **Mr. Cecilio PEREGRÍN GONZÁLEZ**
REPRESENTATIVE OF THE BUSINESS ORGANIZATIONS IN ALMERÍA. ASEMPAL.
- **Mr. Eduardo LÓPEZ GODOY**
REPRESENTATIVE OF BUSINESS ORGANIZATIONS. OFFICIAL CHAMBER OF COMMERCE,
INDUSTRY AND NAVIGATION OF ALMERÍA.
- **Mr. Francisco ALBACETE PÉREZ**
RELEVANT ECONOMIC SECTORS PORT SECTOR
- **Mr. Ignacio ÁLVAREZ-OSORIO RAMOS** (SINCE 08/10/2024)
MANAGING DIRECTOR OF THE ANDALUSIAN PORTS AGENCY

- **Ms. Dolores MARTÍNEZ UTRERA** (SINCE 19/09/2024)
DELEGATE FOR DEVELOPMENT, TERRITORIAL STRUCTURING AND HOUSING.
FREELY APPOINTED COUNSELOR OF THE PRESIDENCY, ADMIN. PUBLIC AND INTERIOR.
- **Ms. María Aránzazu MARTÍN MOYA**
FREELY APPOINTED REPRESENTATIVE OF THE PRESIDENCY DEPARTMENT OF THE
REGIONAL GOVERNMENT OF ANDALUSIA. - GOVERNMENT DELEGATE IN ALMERÍA.
- **Mr. Javier TORRES BELMONTE**
GENERAL SECRETARY OF THE PORT AUTHORITY OF ALMERÍA AND SECRETARY OF THE
BOARD OF DIRECTORS.
- **Ms. María Ángeles GUARNIDO RUEDA**
DIRECTOR OF THE PORT AUTHORITY.

1.1.2 Substitute Board Members

- **Onofre SÁNCHEZ CASTAÑO**
REPRESENTATIVE OF THE PUBLIC AGENCY OF PORTS OF ANDALUSIA.
- **Mr. Salvador HERNÁNDEZ HERNÁNDEZ**
REPRESENTATIVE OF THE HON. CARBONERAS CITY COUNCIL
- **Ms. Ana María MARTÍNEZ LABELLA**
REPRESENTATIVE OF THE MOST HONORABLE ALMERÍA CITY COUNCIL.
- **Mr. Francisco José MORA SILVA**
REPRESENTATIVE OF THE GENERAL UNION OF WORKERS.
- **Ms. María Isabel FLORES HERNÁNDEZ**
REPRESENTATIVE OF THE WORKERS' COMMISSIONS IN ALMERÍA.
- **Ms. Encarnación GIL SERRA**
REPRESENTATIVE OF THE BUSINESS ORGANIZATIONS. ASEMPAL
- **Mr. Arturo CRUZ NIETO**
REPRESENTATIVE OF THE MOST RELEVANT ECONOMIC SECTORS IN THE PORT AREA.
- **Mr. Antonio Bartolomé MENA RUBIO**
FREELY APPOINTED REPRESENTATIVE OF THE PRESIDENCY DEPARTMENT OF THE
REGIONAL GOVERNMENT OF ANDALUSIA. - COUNCILOR FOR SUSTAINABILITY,
ENVIRONMENT AND BLUE ECONOMY.
- **Ms. Carmen Belén LÓPEZ ZAPATA**
FREELY APPOINTED. COUNCILLOR FOR PUBLIC WORKS AND HOUSING

1.2.- Personnel list of the Port Authority of Almería

1.2.1 Senior Position

NAME	POSITION
Soto Rico, María del Rosario	President
Guarnido Rueda, María Ángeles	Director (FROM 07/08/2025)
Sánchez del Águila Rubio, José Manuel	Director (UNTIL 06/08/2025)

1.2.2 Personnel outside the Agreement

NAME	POSITION
Bayo Martínez, Antonio	Head of Planning and Infrastructure Area
Guarnido Rueda, M ^a Ángeles	Head of Operations and Development Area
Almansa Sáez, Francisco Javier	Head of Building and Conservation Department
Fernández-Pacheco Monterreal, Borja	Head of Business Operations and Development Department
García Morales, Carmen	Head of Presidency, HR-OSH and Corporate Communication Department
Hernández Gómez, José Antonio	Head of Economic-Financial Department
Torres Belmonte, Javier	Head of General Secretariat and Legal Advisory Department
Ferrer Santos, Antonio	Head of Infrastructure and Innovation Department
Martínez Castro, Alejandro	Head of Strategic Planning Department
Cuesta Durbán, José Antonio	Head of Commercial Division, Business Development and External Projection
Serrano Alonso, Manuel Alejandro	Head of Safety & Security Division
Rodríguez Ibáñez, Jesús	Head of Port Operations and Services Division
Doucet López, José Luis	Head of Sustainability Division
López García, José Miguel	Head of the Port Police Division
Pinel Rosario, Luis Carlos	Head of the Communication Systems Division
Piedra Belmonte, Laura	Head of the General Secretariat-Legal Advisory and Contracting Division
Quero Gil, Christian	Head of the Operations and Projects Division
Fenoy Gázquez, Carmen Belén	Head of the Communication and Corporate Image Division and the Press Office
García Pérez, Francisco	Head of the Purchasing Unit

1.2.3 Permanent staff under the Agreement

NAME	POSITION
Abellán Arenas, Rubén	Port Police
Aguilera Cortés, Francisco César	Port Police
Aparicio Maldonado, José Luis	Head of the Port Police Service
Artacho Piedrafita, Alejandro	Maintenance Manager
Baños Márquez, Laura	Infrastructure Manager
Bueno Carrasco, Manuel	Head of the Port Police Service
Campos Daroca, Eduardo	Head of Port Police Services
Carmona Aguilera, Juan	Port Police
Carreras Pérez, Visnu	Manager of Port Operations and Services
Checa Kerry, Marco	Commercial and Marketing Manager
Cruz López, José Ramón	Works and Maintenance Officer
De la Iglesia Alonso, Jesús	Port Police
Díaz Galindo, David	Port Police
Díaz Hernández, Juan Jesús	SAN Technician
Díaz Silvente, Juan Antonio	Manager of Port Operations and Services
Escánez Carrillo, Ana María	Economic-Financial Manager
Estrada Alonso, Julio	Port Police
Estrada Jiménez, José Javier	Works and Maintenance Officer
Estrada Muñoz, Antonio	Customer Service Technician
Fernández Clement, Rocío	Port Police
Fernández Luque, Diego Armando	Head of the Port Police Team
Fernández Medina, Vicente Daniel	Head of Port Police Team
Fernández Quesada, Francisco	Head of Port Police Team
Fernández Rodríguez, Raúl Nicolás	Head of Port Police Team
Fernández Valero, Isabel María	Commercial and Marketing Technician
Galdeano Martín, Raúl	Port Police
Galera García, Javier	Port Police
Gálvez Ruíz, Carmen	Administrative Assistant
Gálvez Ruíz, Irene	Head of Port Police Service
Gallardo Torres, Antonio	Public Domain Technician
García Aguilera, Noemí	Port Police
García Barón, José Ángel	Economic-Financial Technician
García Cañadas, Francisco Javier	Head of Port Police Team
García García, José Miguel	Port Police

NAME	POSITION
García López, Lorenzo Manuel	Port Police
García Martínez, Juan Manuel	Works and Maintenance Officer
García Romero, Francisco Javier	Port Police
Gil Consentino, María del Pilar	Head of Port Police Team
Godoy Gallardo, María Teresa	Administrative Assistant
Gómez Muñoz, Federico	Mechanical Equipment Operator
Gómiz García, Francisco Javier	Head of Port Police Team
Góngora Muñoz, Dolores Carmen	Administrative Assistant
González Expósito, Luis Ángel	Works and Maintenance Officer
González Jiménez, M ^a . Ángeles	Billing Technician
González Martín, Sergio Javier	Works and Maintenance Officer
Granados Guerrero, Beatriz	Technician of the Office of the General Secretariat
Gutiérrez del Águila, Manuel Jesús	Technician in Navigation Aid Systems
Gutiérrez Yelamos, Juan Enrique	Port Police
Guzmán González, Jorge	Port Police
Hermoso Giménez, Brígido	Head of Port Police Team
Hernández Berenguel, Antonio Javier	Port Police
Hernández Ortiz, Víctor	Port Police
Herrera Barón, Sonia	Support Services
Ibáñez Hervilla, Manuel	Works and Maintenance Officer
Jiménez de Cisneros Gutiérrez, Soledad	Head of the General Secretariat Office
Jiménez Rodríguez, Julio Alberto	Port Police
Joya Guirado, Juan Francisco	Infrastructure Technician
Lao Ramos, Consolación	Safety Technician
Lázaro Cortes, Agustín	Head of Port Police Team
Lázaro Cortes, José Blas	Works and Maintenance Officer
López Ferres Francisco Miguel	Works and Maintenance Officer
López Morales, María del Mar	Administrative Assistant
López Moreno, Juan Carlos	Port Police
López Romano, Gustavo	Head of the Port Police Service
Lozano Ferrer, Gabriel	Port Police
Lozano Ferrer, Miguel	Port Police
Martín Martínez, María Eugenia	Human Resources and Organization Technician
Martínez Gutiérrez, Armando	Navigation Aids Systems Technician

NAME	POSITION
Martínez López, Miguel Ángel	Port Police
Martínez Nieto, Lucía	Administrative Assistant
Martínez Vargas, Víctor	Port Police
Medialdea Pérez, Ángel	Works and Maintenance Officer
Medialdea Pérez, Miguel	Port Police
Medina Capel, Juan Pedro	Head of Port Police Team
Miralles Lázaro, Patricia	Administrative Assistant
Montilla Rodríguez, María Luisa	Head of Billing
Montoya Ponce, José María	Head of Port Police Team
Montoya Ponce, María Rosa	Support Services
Mora Silva, Francisco José	Head of the Port Police Service
Morales Cerezo, José	Support Services
Moreno César, Juan Manuel	Port Police
Murillo Rodríguez, Cristóbal	Port Police
Navarro Sánchez, Eva María	Head of Public Domain
Ojeda de Haro, Diego	SAN Technician
Ortega Miras, Ismael	Port Police
Ortega Sánchez, Agustín Raúl	Port Police
Ortiz Asensio, Alfredo	Port Police
Ortiz Úbeda, Ignacio	Port Police
Padilla García, Francisco	Works and Maintenance Officer
Padilla García, José	Head of the Port Police Service
Pardo Espinosa, Francisco Javier	Port Police
Peñas Pedrosa, Beatriz	Administrative Assistant
Ramos Ramos, Ana	Support Services
Reyes Espinosa, Francisco José	Support Services
Reyes Giménez, José María	Support Services
Roca López, José Luis	Works and Maintenance Officer
Rodríguez Lirola, Francisco Guillermo	Head of Port Police Team
Salmerón Romero, Raquel	Infor. and Communication Systems Technician
Sánchez Fernández, Guillermo	Head of Port Police Team
Sánchez Pérez, Raúl	Mechanical Equipment Operator
Sánchez Sánchez, María del Carmen	Head of the General Secretariat Office
Santos Pérez, Francisco José	Port Police
Sanz Cruz, Mario	Navigation Aids Systems Technician

NAME	POSITION
Serrano Alonso, Carlos Germán	Environmental Technician
Siles Juárez, David	Head of the Port Police Service
Silva Fortes, Javier	Port Police
Stabile Bibbo, Julio Marcelo	Works and Maintenance Officer
Tamayo Carreño, Antonio Miguel	Maintenance Manager
Torrente Pérez, Javier	Port Police
Torres Acacio, Francisco Javier	Port Police
Tudela Asensio, Pedro	Port Police
Valdivia Sáez, Alberto Domingo	Port Police
Valverde Fernández, Isaac	Port Police
Valle Lázaro, Francisca	Inform. and Communication Systems Technician
Ventura Álvarez, Luís Francisco	Port Police Team Leader
Vera Delgado, José María	Support Services
Vílches Jiménez, Jaime	Port Police
Yanguas González, Arturo Jesús	Port Police
Zea Gandolfo, Antonio	Head of Navigation Aid Systems

1.2.4 Temporary staff under agreement

NAME	POSITION
Arcos Ponce, Antonio	Port Police
Bahmad Guetioni, Oussama	Port Police
Guirado Magán, José Manuel	Mechanical Equipment Operator
López Arcos, Miguel	Port Police
Mirallas Ferrer, Francisco	Works and Maintenance Officer
Murcia Ramos, Francisco José	Port Police
Ortigosa Vicente, Gema	Administrative Assistant
Pimentel Fernández, Saray	Port Police
Vázquez Ación, Gustavo Adolfo	Port Police
Villoslada Martín, Pablo	Port Police

Management Report 2025

1.- Information on traffic

The total cargo traffic handled in the ports managed by the Port Authority of Almería during 2025 amounted to 6,149,243 tonnes, 10.13% more than in the previous year, when 5,583,853 tonnes were handled.

The Port of Almería increased its cargo traffic by 6.90%, rising from 3,351,423 tonnes at the end of 2024 to 3,582,832 tonnes in 2025, mainly due to the increase in gypsum and General Cargo. Solid bulk increased by 3.26%, with gypsum standing out, which rose by 4.58%, reaching 1,817,640 tonnes; cement and clinker amounted to 194,339 tonnes, with an increase of 7.71%. General cargo as a whole increased by 12.91%, with rises in peat, food products, and other goods. Meanwhile, Ro-Ro traffic reached 1,017,653 tonnes, 16.31% more than the previous year.

At the Port of Carboneras, cargo traffic increased by 16.29%, rising from 2,134,631 tonnes in the previous year to 2,482,327 tonnes in 2025. The most significant variations are detailed below:

The port of the Endesa Thermal Power Plant had no activity in 2025, as was the case in 2024, since, from 27/12/2019, when ENDESA submitted the formal request for closure of the Carboneras thermal power plant to the Ministry for Ecological Transition, its activity has been progressively reduced.

The Lafargue-Holcim port decreased by 1.45% compared to the previous year, dropping from 643,525 tonnes to 634,185 tonnes in the current year.

At the Ribera I quay, managed directly by the Port Authority, cargo traffic also experienced an increase of 24.06%, reaching 1,841,051 tonnes in 2025 compared to 1,483,974 tonnes handled in 2024. Solid bulk increased by 18.69%, with a notable rise in gypsum (+46.31%), which handled 1,297,142 tonnes compared to 886,593 tonnes in the previous year, and an increase in other goods (+6.84%). Feldspar experienced an increase of 6.6%, reaching 224,768 tonnes. Liquid bulk (oils, biodiesel, and their blends) decreased slightly by 0.36%, from 122,835 tonnes in 2024 to 122,395 tonnes in the current year.

The Ribera II Quay, affected by the closure of the Thermal Power Plant, in its exclusive coal distribution traffic to thermal power plants in Mediterranean ports, handled only 7,091 tonnes in 2025.

Passenger traffic at the Port of Almería experienced a decrease of 9.30%, due to the loss of a rotation line with Melilla after the Motril-Melilla line was declared a public service obligation (OSP) by the Government, dropping from 988,435 passengers in 2024 to 896,530 passengers in 2025.

Vehicle traffic under passenger regime has also logically decreased, from 259,740 to 238,623 units.

The number of cruise ships in 2025 was 28, compared to 20 that called at the Port of Almería in the previous year.

Regarding the vessels that entered during 2025 in the ports managed by the Port Authority of Almería, there were 1,705 compared to 2,030 in the previous year, representing a decrease of 16%. In Almería, the number of vessels was 1,511 compared to 1,833 in the previous year, representing a decrease of 17.57%, due to the lower rotation with Melilla mentioned earlier. In Carboneras, the number of vessels increased by 0.52%, from 193 last year to 194 this year.

The tonnes of fish landed during 2025 were 4,717 compared to 3,813 in the previous year, representing an increase in catches of 23.71%. Ship supplies decreased by 16.63% compared to the previous year, from 93,986 tonnes in 2024 to 79,367 in the current year.

2.- Economic Information.

At the close of the 2025 fiscal year, the Operating Result was positive at €12,820,075.67, much higher than the operating result recorded in the previous year of €2,017,786.42, due to the mutual Agreement for the total termination of ENDESA's concession in Carboneras, which has accounted for a positive operating result of €8,436,312.56. The accumulated net amount of turnover and other operating income in the ports managed by the Port Authority was €29,146,899.90 compared to €20,490,254.62 in the same

period of the previous year, representing an increase of 42.25%. Of the total net turnover, the Port of Almería represents 52.93% this year, and in Carboneras, Endesa accounts for 32.49%, due to the economic impact of the mutual Agreement; LafargeHolcim accounts for 5.02%, Ribera I Quay managed by the Port Authority 6.16%, Ribera II Quay 1.06%, and the rest of the concessions in Carboneras 2.34%.

At the Port of Almería, the net amount of turnover and other operating income has been maintained at the same level as in 2024, offsetting the decrease in the passenger fee (T2) with increases in the vessel fee (T1) and the cargo fee (T3). Occupation and activity fees have also increased, the latter to a greater extent, compared to 2024.

At the Port of Carboneras, the Net Amount of turnover and other operating income was €3,975,723.62. The port of the Endesa Thermal Power Plant has generated this year, due to the mutual Agreement for total termination, income of €9,470,858.93. The LafargeHolcim port's income amounted to €1,461,888.22. The direct management of the Ribera I quay by the Port Authority resulted in income of €1,795,133.98, thanks to the good performance of gypsum. In the concession granted to Endesa for the Ribera II Quay, the net amount of turnover was €310,158.95.

As for expenses, operating expenses in 2025 amounted to €6,921,174.78 compared to €7,425,232.97 in 2024, having decreased by 6.78% compared to the previous year, despite the widespread increases in supply and service prices due to inflation, thanks to the efforts made in management, rationalization, and cost containment, maintaining optimal levels of service and conservation of our infrastructure, and because in this fiscal year, resources for ENDESA-Carboneras for their fees were not provisioned.

Personnel expenses, which amounted to €6,893,253.39, experienced an increase of 2.91% compared to those recorded the previous year, due to new hires following the approval of the public employment offer for 2025.

Regarding financial expenses, it should be noted that during 2025 they amounted to €152,789.09, of which €146,216.57 correspond to the financial update of long-term accruals and €6,572.52 to other expenses with credit institutions.

The final results for the 2025 fiscal year show a positive result before taxes of €13,090,519.59, higher than the result recorded in 2024 of €2,386,162.21. From this result, the fiscal effect of the corporate income tax must be deducted,

amounting to €249,521.61, resulting in a final positive result for the fiscal year of €12,840,997.98.

3.- Financial Information.

The applied ratios yield positive values that allow us to state that short-term liquidity or solvency is excellent, with sufficient current assets (realizable in the short term) to comfortably meet current liabilities (payable in the short term). The guarantee offered by the entity to third parties is that of a sound company, with sufficient equity to cover all debts.

The Port Authority presents an adequate financial balance, as demonstrated by the solvency of the working capital (Current Assets - Current Liabilities), which is within the generally accepted limits in relation to the company's assets.

Financial autonomy is complete, with Net Equity standing at 87.44% of the sum of Equity and Liabilities, which is well above the recommended minimum of 65%.

The short-term debt ratio is low and fully manageable, representing only 2.64% of the total Equity and Liabilities.

The weight of long-term debt, in relation to total financing, stands at 7.45%, which is within the recommended limits. Total debt (short and long term) amounts to 10.09%, not exceeding the recommended maximum percentage of 35% of Equity and Liabilities. This long-term debt is due to the criteria to be applied in the corporate income tax, which causes the tax effect of capital grants to consider 25% of the total of such capital grants as a deferred tax liability, which would be included within non-current liabilities.

Financial profitability, which measures the profit obtained by the company with its own resources, is 7.82%; and economic profitability, which expresses the ability to generate profits with our assets, is 8.37%, marked this year by the mutual Agreement with ENDESA.

Below are the ratios used in the preparation of this report and their evolution compared to the previous year, expressed numerically.

SHORT-TERM LIQUIDITY OR SOLVENCY RATIO			2025	2024
Current Assets	=	$\frac{17.140}{9.578}$	= 1,78	4,77
Current Liabilities				
LONG-TERM GUARANTEE RATIO			2025	2024
Total assets		$\frac{187.769}{23.578}$	= 7,96	5,47
Non-current + Current liabilities				
BREAK-EVEN RATIO (%)			2025	2024
Current assets - Current liabilities	=	$\frac{7.562 \times 100}{187.769}$	= 4,02	7,61
Assets				
FINANCIAL AUTONOMY RATIO (%)			2025	2024
Net worth	=	$\frac{164.191 \times 100}{187.769}$	= 87,44	81,82
Net worth + Liabilities				
SHORT-TERM DEBT RATIO (%)			2025	2024
Current liabilities	=	$\frac{4.967 \times 100}{187.769}$	= 2,64	1,72
Net worth + Liabilities				
LONG-TERM DEBT RATIO (%)			2025	2024
Non-current liabilities	=	$\frac{14.000 \times 100}{187.769}$	= 7,45	15,34
Net worth + Liabilities				
FINANCIAL RETURN RATIO (%)			2025	2024

6.2.- Description of the Main Works

Completed or Ongoing Projects and Works

REFURBISHMENT OF RIBERA QUAY SECOND BERTHING LINE WAREHOUSES

The buildings concerned are two existing industrial warehouses owned by the Port Authority of Almería, which are to be adapted for a different use from their current one.

The warehouses are located on the second berthing line of Ribera Quay, adjacent to Shed 5 and the former Border Inspection Post (BIP), with a total area of 1,903.05 m². They are adjoining buildings separated by a precast concrete panel partition identical to the façade enclosure.

The purpose of this refurbishment is to enable the future use of the two existing industrial warehouses opposite the second berthing line of Ribera Quay at the Port of Almería as a vehicle holding area for passengers travelling to North Africa, adapting them accordingly.

To achieve this, the works under this contract comprise the dismantling and subsequent demolition of the perimeter enclosure formed by precast concrete panels surrounding the two industrial warehouses and their removal to an authorised waste disposal site, while preserving the reinforced concrete portal frame structure, the concrete roof trusses and the existing roof.

INVESTMENT: €122,000.00

REFURBISHMENT OF OFFICES IN THE APA ADMINISTRATIVE BUILDING

The existing layout of the south-facing areas on the third and fourth floors of the APA administrative building no longer met the operational requirements of the Port Authority, as these floors had originally been designed as residential accommodation, resulting in excessive compartmentalisation and an inefficient use of space. The refurbishment was undertaken to remodel the interior of these floors, creating a more functional working environment.

The works consisted of opening up the interior space to reorganise workstations and accommodate new staff, while renewing the finishing materials. This involved interventions to ceilings, partitions, flooring and the existing building services.

The total refurbished floor area amounts to 450.22 m², distributed over two storeys.

The refurbishment affected the first, third and fourth floors of the APA administrative building, located on Levante Quay. The building's main façade faces west.

The building comprises five storeys. The ground, first and second floors are used for the Port Authority's administrative activities, the third floor accommodates the offices of the State Legal Service, while the fourth floor is currently unoccupied.

INVESTMENT: €332,947.43

RESTORATION OF THE DEUTZ SHUNTING LOCOMOTIVE

The Deutz shunting locomotive, manufactured by the German company DEUTZ AG, played a key role in operations at the Port of Almería from the late 1920s until the 1960s. These German locomotives had a hauling capacity of 600 tonnes, enabling them to pull trains of more than sixty wagons. Their primary function was to facilitate the movement of goods, particularly minerals and agricultural products, between the port and inland destinations.

During the Spanish Civil War, the Port of Almería was placed under military control, although the railway continued operating, transporting food and essential supplies. In the post-war period, it was adapted to carry coal from Gijón, demonstrating both its versatility and its importance within the port's logistics system.

Having been out of service for many years, the locomotive is to be restored as a historic railway asset open to visitors. The principal objective of the restoration has been to return the Deutz locomotive to its original appearance, preserving its historical value and ensuring its long-term conservation. It is intended to become part of educational and tourist exhibitions, highlighting the rich industrial and maritime heritage of Almería.

INVESTMENT: €85,000.00

RESTORATION OF THE WILCOX CRANE ON THE FIRST BERTHING LINE OF RIBERA QUAY

Babcock & Wilcox Company (B&W) was an American multinational company engaged in the design, engineering, manufacture, servicing and construction of power generation equipment and pollution control systems for utilities and industrial facilities.

During the First World War, the difficulties experienced by the Compañía de los Caminos de Hierro del Norte de España in acquiring new locomotives prompted the railway company to establish a specialist company dedicated to the construction of steam locomotives. As a result, Sociedad Española de Construcciones Babcock & Wilcox was founded on 1 March 1918. Its principal manufacturing facilities were built at Vega del Galindo, in Sestao, near Bilbao, where the company became popularly known as “La Balco”.

The yellow crane, standing 20 metres high, is one of the few surviving port structures from the 1960s and remains an iconic reminder of the port activity of the mid-twentieth century. Its most distinctive features include the timber operator’s cab, the jib and the riveted steel base structure. With a maximum lifting capacity of 25 tonnes, it was manufactured by Sociedad Española de Construcciones Babcock & Wilcox at its Galindo works in Biscay.

As part of the Port Authority of Almería’s ongoing programme to enhance and preserve its historic port heritage within the framework of the Port-City model, the Wilcox crane located on the first berthing line of Ribera Quay has been restored.

The restoration returned the Wilcox crane to its original industrial appearance. In addition to the structural rehabilitation of deteriorated elements, public access to the operator’s cab has been provided through the construction of an external staircase attached to the crane, allowing visitors to enter and view it.

INVESTMENT: €335,000.00

ROOFTOP PHOTOVOLTAIC SOLAR PLANT FOR SELF-CONSUMPTION ON THE PCF BUILDING

An 80 kW nominal-capacity photovoltaic solar installation has been built on the roof of the PCF building for self-consumption. The electricity generated is used exclusively by the facility itself, with no export to the grid, through

the incorporation of a dynamic power control system with export limitation.

The photovoltaic plant consists of 180 photovoltaic modules rated at 545 W, arranged in 10 strings of 18 panels connected in series and installed on the building roof. The strings are connected to an 80 kW inverter incorporating DC protection systems and individual monitoring of each string.

The inverter room has also been fitted out with new flooring, plaster finishes, standard and emergency lighting installations. In addition, the DC cable routes from the roof to the inverter have been installed.

INVESTMENT: €67,010.88

CONNECTING BRIDGE FROM THE DUKE OF ALBA DOLPHIN AT RIBERA QUAY I, PORT OF CARBONERAS, TO SHORE

The Port Authority of Almería, as part of its planned developments and in response to the forecast increase in liquid bulk traffic at the Port of Carboneras, anticipates greater use of the new Duke of Alba dolphin adjacent to Ribera Quay for the berthing of different types of vessels.

To connect Ribera Quay I at the Port of Carboneras with the existing Duke of Alba dolphin, several alternatives were analysed before developing the construction design for a connecting bridge.

The aim is to provide continuity between the quay and the dolphin, enabling future operational use by incorporating two separate zones within the bridge: one for pipelines and service installations, and another for vehicle traffic, thereby facilitating cargo loading and unloading operations.

The adopted solution bridges the existing distance of 79.80 metres between Ribera Quay I and the Duke of Alba dolphin by means of an embankment and a reinforced concrete bridge structure. The bridge has been designed to accommodate heavy vehicle traffic on one carriageway, while the other carries the various service pipelines.

The works were completed and formally accepted on 11 February 2025.

INVESTMENT: €1,467,948.65

SECURITY FORCE FACILITIES

The security forces operating at the Port of Almería, namely the Port Police, the Civil Guard and the National Police, are currently accommodated within the Passenger Terminal building. These facilities occupy a considerable amount of floor space, limiting the terminal's potential for expansion to accommodate shipping companies and other passenger-related services. Furthermore, their location within the building restricts the implementation of future passenger terminal improvement projects.

The Port Authority's Investment Plan therefore includes the refurbishment and adaptation of facilities for the Security Forces and the Port Police.

LIGHTING TOWERS FOR THE CONTAINER TERMINAL

This project is intended to improve the lighting of the container terminal on West Quay, which currently has only one 30-metre lighting tower of similar characteristics to those proposed, in order to meet the operational requirements of the terminal.

The project includes the supply, installation and commissioning of 38 LED floodlights rated at 660 W mounted on four new 30-metre-high lighting towers, together with 10 LED floodlights rated at 330 W mounted on four new 7-metre columns on West Quay at the Port of Almería. It also establishes the technical specifications, installation conditions, timetable and location for the works.

INVESTMENT: €284,500.00

FUNCTIONAL, STRUCTURAL AND ENERGY REFURBISHMENT OF THE SLIPWAY BUILDING

The project will improve the functionality, structural integrity and energy performance of the historic Slipway Building located in the Fishing Port, adapting it, while preserving its century-old architecture, for use as a conference and events venue.

The interior will be reconfigured to provide seating for 202 attendees and will include a catering kitchen for events. The roof coverings will also be replaced, improving both the structural performance and the energy efficiency of the building.

INVESTMENT: €698,500.00

MARITIME TRAFFIC CONTROL AT THE PORTS OF ALMERÍA AND CARBONERAS

The Port Authority of Almería and the Spanish Maritime Safety and Rescue Agency (SASEMAR) have signed an agreement under which the latter provides the general service of maritime traffic management, coordination and control, together with emergency response coordination in the event of marine pollution incidents within the service areas of the Port of Almería, under the responsibility of the Port Authority.

Both organisations have agreed to extend this arrangement to include the provision of the same services within the service area of the Port of Carboneras, also under the responsibility of the Port Authority.

Each organisation will provide the material resources required for the service, primarily electronic equipment, which must in all cases be fully compatible and seamlessly integrated with the systems currently operating at the Almería Maritime Rescue Coordination Centre, from which the contracted services will be delivered.

The equipment was formally accepted on 4 June 2025.

INVESTMENT: €907,325.96

REPAIR OF THE PECHINA AND WEST QUAY EDGES

The project comprises the refurbishment, repair and treatment of the quay edges at West Quay and Pechina Quay. Structural repairs have been carried out to restore the damaged quay edge beams to their original geometry, reinforcement and appearance.

The quay edges of both quays are reinforced concrete structures showing significant deterioration, including concrete damage to the vertical faces, corrosion of embedded reinforcement, longitudinal cracking, concrete spalling and exposed corroded reinforcing bars. In several areas, advanced corrosion had caused a loss of reinforcement section, affecting both the structural condition and appearance of the quay edge beams, while detached concrete falling into the sea had reduced the operational water depth alongside the berths.

Following inspections commissioned by the Port Authority during June and July, additional issues were identified, including reduced water depth caused by accumulated debris, local settlement beneath the caissons and openings between foundation blocks. These defects were corrected by restoring the affected areas and recovering the original water depth through the removal of debris, stored fenders and localised deposits of fill material.

The works were completed and formally accepted on 19 March 2025.

INVESTMENT: €390,768.28

INSTALLATION OF PONTOONS 5 AND 6 AT THE FISHING PORT

This project comprised the supply, installation and commissioning of two floating pontoons to be installed in the anchorage area of the Port of Almería Fishing Harbour, with the aim of increasing the number of berths available for fishing and recreational vessels.

The contract also included positioning the pontoons at the locations designated by the Port Authority, fully assembled and ready for immediate use with all necessary accessories, including the required connections to the water and electricity networks.

The equipment was formally accepted on 24 March 2025.

INVESTMENT: €269,986.32

NEW MOORING POINT AT THE PORT OF CARBONERAS

The purpose of this project is the construction of a new mooring point incorporating a quick-release hook adjacent to Ribera Quay I at the Port of Carboneras. The project also includes ancillary works to enable its use for vessels berthing at the Duke of Alba dolphin.

Following the construction of the Duke of Alba dolphin to the south of Ribera Quay at the Port of Carboneras, the Port Authority of Almería intends

to use this infrastructure for berthing liquid bulk vessels of up to 45,000 DWT and 180 metres in length.

To provide a safe mooring arrangement for vessels berthing at the Duke of Alba dolphin, it is necessary to create a new mooring point on the apron behind the dolphin. This mooring point consists of a twin 75-tonne-per-hook quick-release hook (QRH), identical to the one already installed at the northern end of the same apron.

The works were completed and formally accepted on 4 April 2025.

INVESTMENT: €231,493.53

IMPROVEMENT OF THE PESCADERÍA ACCESS CONNECTION

This construction project provides for the comprehensive remodelling of the internal road network of the Port of Almería adjacent to the access from the N-340a. Its primary objective is to improve the connection between the port and the N-340a via the existing Pescadería roundabout located at kilometre point 439 of the N-340a. The project will also reduce heavy vehicle congestion at the city's main access from the motorway (Vía Parque exit) and improve pedestrian safety.

Under the proposed scheme, heavy goods vehicles entering the port will use a new direct slip road with a dedicated deceleration lane leading to a

new roundabout replacing the existing one within the port estate between the Pescadería Roundabout and the PCF/CADE complex (Gates 3, 5 and 6). This new slip road will branch off approximately 220 metres before the Pescadería Roundabout, removing the need for heavy vehicles to enter the roundabout and significantly easing congestion at this location.

Accordingly, heavy goods vehicles travelling along the N-340a from the A-7 towards the port will enter at kilometre point 439, approximately 220 metres before the Pescadería Roundabout. From the roundabout itself, only a single access to the port will remain, comprising one entry lane and one exit lane. Traffic leaving the port towards the city of Almería will use a new slip road with an acceleration lane joining the N-340a approximately 150 metres beyond the Pescadería Roundabout.

Within the port estate, two new roundabouts and an upgraded internal road network have been designed to improve the existing road system.

The works were completed and formally accepted on 5 November 2025.

INVESTMENT: €2,505,148.42

RAIL ACCESS STUDY

The purpose of this project is to provide consultancy services to the Port Authority of Almería for the preparation of a construction feasibility study assessing the alternative options for rail access to the Port of Almería.

The study will evaluate and analyse the feasibility of the various rail access alternatives, taking into account both existing and forecast freight services to and from the Port of Almería, together with the particular constraints arising from its urban setting.

It will also define the scope of work for each technical discipline during the successive stages of the study, comprising an initial phase of preliminary investigations followed by a detailed construction feasibility assessment of the alternative options.

INVESTMENT: €399,948.29

REHABILITATION OF PUNTA DE BAÑOS LIGHTHOUSE

The purpose of this project is to rehabilitate Punta de Baños Lighthouse, whose condition requires specific maintenance and conservation works to repair the damaged elements of the structure, thereby ensuring its long-term durability and structural stability.

Severe structural damage has been identified on all façades of the reinforced concrete building, with significant cracking affecting between 50% and 70% of the total surface area, as well as floor slab edges, columns and other structural elements. The pathology is caused by corrosion of the reinforcement embedded within the concrete, primarily affecting the most exposed elements and likely to result in exposed reinforcement in the near future if left untreated. Additional minor defects were also identified both around the site and within the lighthouse itself. To remedy these deficiencies, the Port Authority of Almería carried out environmental improvements to the surrounding site, repaired the structural damage by restoring the original geometry and reinforcement of the structure and applying an ad-

ditional protective coating to minimise future corrosion, refurbished the interior through repainting and the replacement of damaged skirting boards and floor finishes, and replaced the metal joinery, ironwork and glazing.

The works were completed and formally accepted on 12 December 2025.

INVESTMENT: €101,292.38

REPLACEMENT OF THE LANTERN AT CABO DE GATA LIGHTHOUSE

The purpose of this project is the supply and installation of a new lantern for Cabo de Gata Lighthouse. The existing lantern was installed in 1976 and, owing to the passage of time and the harsh weather conditions to which it has been exposed, requires replacement with a more modern unit to ensure the continuation of its role in improving navigational safety.

The principal works comprise the repair of the lantern support wall; the installation and commissioning of a sector LED beacon with a minimum range of 15 nautical miles for an atmospheric transmissivity coefficient of 0.74, which will operate as the lighthouse during the works; protection of the existing optical equipment and pedestal to prevent damage; removal of the existing lantern; installation of anchor bolts for the lower ring of the new lantern; and the assembly and painting of the new lantern.

The equipment was formally accepted on 28 November 2025.

INVESTMENT: €98,550.00

NEW BUILDING ENVELOPE FOR THE PORT AUTHORITY ADMINISTRATIVE BUILDING AND SURROUNDING URBAN DEVELOPMENT

The objective of the refurbishment and renovation project is to provide the building with a new architectural identity and transform it into an efficient, modern facility. The proposal introduces a bold and innovative design, as the building will become the first landmark encountered by visitors entering the Port-City development and its new urban environment.

Owing to its location and orientation, the new design is intended to evoke the form of a vessel, using innovative materials and projecting volumes that contribute to the building's energy efficiency. In particular, the inclined plane of the north façade is designed to resemble the bow of a ship, welcoming visitors to the new urban space.

The proposal incorporates mirrored glazing, reflecting the sea and the sky from every direction and allowing the building to blend harmoniously into its surroundings. The remainder of the façade is primarily clad with highly durable white ultra-compact panels. White has traditionally been the predominant colour along the Almería coastline because of the local climate, reinforcing a sense of identity and making the building a symbol for all the people of Almería.

The former Mineral Loading Pier, known as the Cable Inglés, is one of Almería's most iconic landmarks and an important architectural reference, and therefore occupies a central place in the new design concept. A new rooftop plaza has been created, providing panoramic views eastwards towards the Cable Inglés and westwards over the Port of Almería, the Alcazaba and Paseo Nicolás Salmerón. Without doubt, the accessible rooftop together with the new public space below will become a new landmark for both the city and the port. In addition, carefully positioned new openings have been created in the façade to frame these architectural and landscape landmarks.

The project also includes the redevelopment of approximately 4,000 square metres surrounding the Port Authority headquarters, creating new

public spaces overlooking the Cable Inglés and the lighthouse. This new urban environment will incorporate shaded squares and street furniture integrated into the overall design, creating a versatile recreational space for the city.

The building's energy-efficiency refurbishment has been co-financed through FEDER 4 funding managed by Puertos del Estado.

INVESTMENT: €3,257,048.29

REMODELLING OF THE HISTORIC SHED

In April 2018, the structural assessment specialist EVINTES CALIDAD S.L.L. prepared a report on the condition of Ribera Quay at the Port of Almería, concluding that the deterioration identified in the horizontal steel structure of the historic shed posed a serious risk to its structural safety. Consequently, the proposed project consists of the refurbishment, improvement and upgrading of the existing shed on Ribera Quay I.

The new structure retains the geometry of the existing one, with slight increases in the dimensions of the structural sections to strengthen the overall framework. Among the original features preserved are a series of decorative brackets located on either side of the columns, which have undergone a restoration process to remove corrosion and ensure their long-term conservation before being reinstated in their original positions.

The restored structure will provide a shaded public space, also intended for passengers during the annual Operation Crossing the Strait. It also incorporates a lighting system capable of creating a wide range of colour effects and is equipped with electricity and sound connections, allowing it to host a variety of events, including concerts and markets.

The works were completed and formally accepted on 25 March 2026.

INVESTMENT: €1,244,488.27

COASTAL RESTORATION AT CARBONERAS

The works included in the project for the restoration of the coastline to its original condition and the improvement of the access road to the Port of Carboneras comprise the repairs required to restore the stretch of coastline south of the port and upgrade the port access road.

The project includes coastal protection works along the affected shore-

line by extending the existing seawall for a length of 180 metres, creating a reclaimed platform behind it at an elevation of +4.50 metres; enclosing the southern end of the reclaimed area; and improving the port access road affected by adverse weather conditions by removing part of the existing pavement, placing successive fill layers and completing the works with a new bituminous surface.

INVESTMENT: €1,953,000.00

EXTENSION OF SALES STALLS AT THE SECOND-SALE FISH MARKET

The purpose of this project is the construction and fitting out of eight new fish sales stalls within the Second-Sale Fish Market at the Port of Almería Fishing Harbour.

The principal works comprise the construction of new concrete bases for the installation of the sales modules; the construction and installation of eight new sales units consisting of hot-dip galvanised steel structures, white Macael marble external cladding, sandwich-panel roofs and aluminium joinery with laminated safety glazing, each identified by numbered vinyl graphics; together with the supply and installation of eight weighing and labelling stations incorporating sales traceability management systems.
